

THE LEFT/RIGHT GAME - Pass 1- 2 wrapped gifts (1-2 Fizz sticks & tea) depending on your group size.

Let's play a fun ice breaker to tell the Arbonne story super-fast! This is a little story and will explain why I said Arbonne is different. When you hear the word "left" pass the gift to the left and when you hear the word "right" pass it to the right. Whoever is holding the gift when I'm finished gets to take it home!

- Arbonne products combine the best of science and nature, using the purest and finest ingredients that perform to get the **RIGHT** results. **RIGHT** next to Pure and Safe, is Arbonne's third philosophy which is Beneficial. It's just not **RIGHT** to spend money on products that don't work, **RIGHT**?
- Arbonne is a certified B corporation – there are only somewhere between 4,000-6,000 in the world! That's amazing, **RIGHT**? A B Corp Certification is a designation that means a company is doing the **RIGHT** things for people and the planet, not just looking for profit.
- Arbonne's mission is to help people to flourish through sustainable, healthy living. Our nutrition products are formulated without artificial colors, flavors or sweeteners and are vegan and cruelty free. Everyone wants to look and feel their best, **RIGHT**?
- Our skin is the largest organ of our body. Did you know that many ingredients **LEFT** on the skin get absorbed into the bloodstream within 26 seconds? Think of nicotine patches, birth control patches, etc. Transdermal delivery is a fast and effective way to get something into your bloodstream. There are many ingredients being used in cosmetics and personal care products that are not **RIGHT** for our overall health, and at Arbonne we ban over 2000 harmful ingredients from being used in our products, whereas the US bans less than 13! Unbelievable, **RIGHT**?!
- That being said, Arbonne is not 100% natural because we know that not everything in nature is safe, **RIGHT**? Poison Ivy for instance...or BellaDonna, which is 100% natural but will kill you if ingested. Olive oil or coconut oil are awesome, but they won't deliver antioxidants into the skin to help with signs of aging, or peel away layers of dull skin. I want cutting edge, anti-aging skincare that actually works. I just want it to be safe, **RIGHT**?
- Arbonne continually analyzes ingredients for safety. For starters, a common ingredient in most skin care is MINERAL OIL, which is simply highly refined crude oil. Using mineral oil on the skin is similar to covering your skin in plastic wrap. It creates a barrier on your skin that does NOT allow ingredients to be absorbed or toxins to be released -- and that's just not **RIGHT**!
- PARABENS are another ingredient that are just down **RIGHT** bad! Parabens are preservatives that are put into products to give them a longer shelf life. Reports show that parabens have been found in breast cancer tumors. This is frightening especially when you consider how many products we use every day that contain them. It is not easy to find products without parabens or mineral oil, but it is so important to your health to be sure that these ingredients are **LEFT** out of your products. You may want to go home tonight and check your labels! You'll probably say "She was **RIGHT**!"
- Last but not least, let's talk about ANIMAL BY-PRODUCTS. Did you know the most prestigious cosmetic companies in this country purchase ingredients from Rendering Plants? Does anyone know what a rendering plant is? Rendering plants are basically collection centers for **LEFT**-over animal parts...dead animals from farms and ranches, slaughterhouses, road kill, euthanized animals, old restaurant grease, expired meat, etc. are all sent to Rendering Plants where everything is ground up, boiled, and the rendered by-product is sold to cosmetic companies. Disgusting, **RIGHT**?!

- All of these ingredients are not **RIGHT** for the skin, and you won't find them in any of our products. So, get ready for the big finish! Arbonne is the **RIGHT** company, with the **RIGHT** philosophy, the **RIGHT** ingredients, and the **RIGHT** products that give the **RIGHT** results. Aren't you glad you're not **LEFT** in the dark anymore about what's not **RIGHT**? The End!

So, whoever is holding the gift is the winner! Congratulations and I hope that was a fun way for everyone to learn about the importance of ingredients and what makes Arbonne different!!
